

Personal Homepage Design Document

Project Description

This project is to create a personal website for everyone to view. It includes my basic personal information like personal introduction, hobbies, work experiences and social media link etc. I'll use HTML, CSS, Bootstrap framework and JavaScript to create my personal website and I will continue to update my website in the future.

User Personas

This website is for those who want to know more about me. Everyone can access this website and follow my social media. It shows my personality to my teammates, peers, professors, etc..

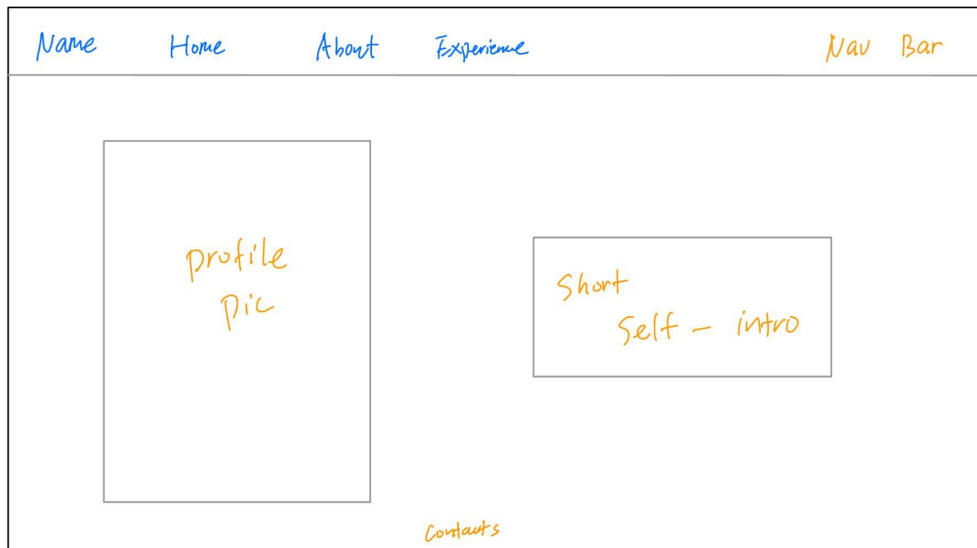

- Tom the student
- John the professor
- Sam the recruiter
- Jane the upcoming student

User Stories

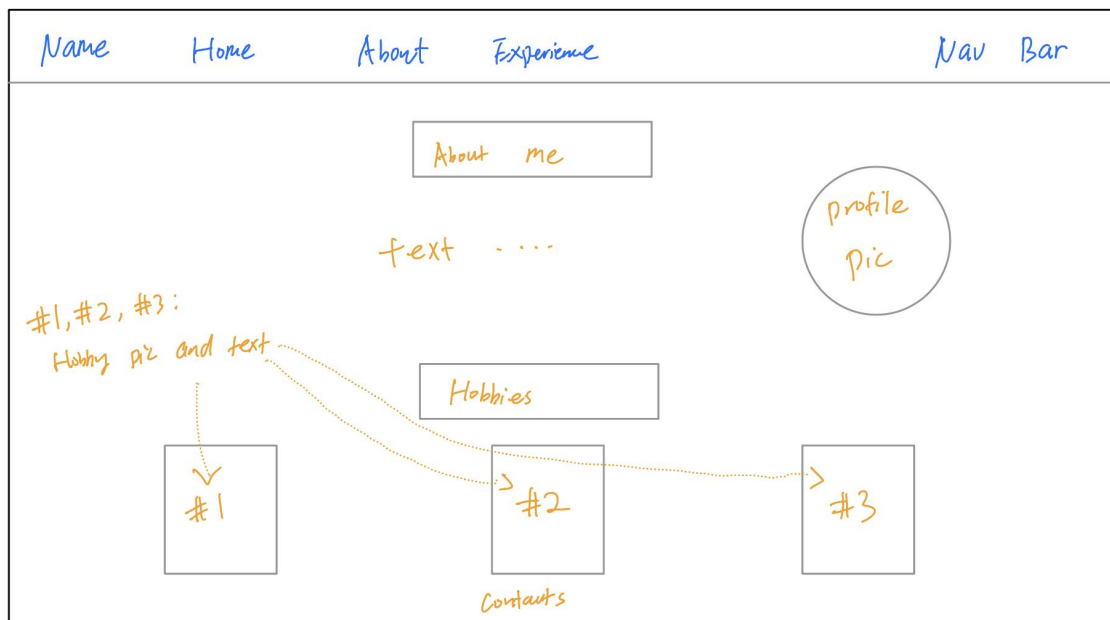

- As my classmate Tom, I want to find out our common interests, so we can hangout together.
- As my professor John, I want to find out his past experiences, so I can adjust my teaching schedule and teach accordingly.
- As a recruiter Sam, I want to know his contact information, so I can schedule an interview with him.
- As an upcoming student Jane, I want to know his internship experience, so I can ask for a referral.
